

21 January 2021

Dear Reader,

Andreas Jablonka worked for me at Tau Films for over two years in the roles of sequence supervisor and compositing supervisor.

He was an integral part of managing teams efficiently across multiple time zones (Los Angeles, Malaysia, China, and India).

He was very pro-active in scheduling, training, and mentoring our artists as well as a driving force behind the development of our remote pipeline. In addition, Andreas became part of the faculty of the John Hughes Institute, teaching online compositing classes and developing our curriculum.

I have been impressed with his technical expertise in many disciplines, his calm under pressure mindset, and his problem-solving attitude. He is very organized and diligent in the execution of the task set before him, and will make a great addition to any facility in need of an experienced supervisor, and is also a rockstar on the box when needed. I would be happy to be a reference and answer any questions potential employers might have.

Sincerely,

John Hughes, President
